Contents

Preface	xv
Nomenclature	xvii
Chapter 1. Geometrical Optics	1
1.1 Introduction	1
1.2. Electromagnetic Spectrum	1
1.3. Imaging Concepts	2
1.4. Thick Lenses and Lens Combinations	8
1.5. Stops and Pupils	13
1.6. Scanning	21
1.7. Image Quality	25
1.8. Materials Considerations	29
Bibliography	35
Problems	35
Chapter 2. Radiometry	38
2.1. Introduction	38
2.2. Solid Angle	38
2.3. Radiometric Quantities	41
2.4. Radiance	45
2.5. Source Configurations	51
2.5.1. Point Sources	51
2.5.2. Extended Sources	52
2.6. Blackbody Radiation	55
2.6.1. Blackbody Radiation Theory	56
2.6.2. Stefan-Boltzmann Law	68
2.6.3. Wien Displacement Laws	69
2.6.4. Finite Spectral Regions	70
2.6.5. Exitance Contrast	71
2.7. Emissivity	72
2.7.1. Kirchhoff's Law	74
2.8. Radiometric Measures of Temperature	76
2.8.1. Radiation Temperature	77
2.8.2. Brightness Temperature	77
2.8.3. Color Temperature	78
References	79
Bibliography	79
Problems	80

Chapter 3. Optical-Detection Processes	86
3.1. Optical-Detector Classification	86
3.2. Photon-Detection Mechanism	87
3.2.1. Photovoltaic Detectors	93
3.2.2. Photoconductors	93
3.2.3. Photoemissive Detectors	98
3.3. Thermal-Detection Mechanisms	100
3.3.1. Bolometers	101
3.3.2. Thermopile Detectors	104
3.3.3. Pyroelectric Detectors	104
3.3.4. Golay Cells	108
3.3.5. Superconductor Detectors	112
3.4. The Photoelectromagnetic Detector	115
References	121
Problems	123
 Chapter 4. Probability and Statistics for Optical Detection	 126
4.1. Introduction	126
4.2. Definition of Probability	126
4.3. Joint and Conditional Probability	128
4.4. Continuous Random Variables and Probability Density	130
4.5. Means and Moments	131
4.6. Moment-Generating and Characteristic Functions	132
4.7. Relevant Probability Distributions	133
4.7.1. Binomial Distribution	133
4.7.2. Poisson Distribution	136
4.7.3. Normal (Gaussian) Density Distribution	146
4.7.4. Uniform Distribution	148
4.7.5. Thermal Distributions of Ideal Gases	148
Reference	150
Bibliography	150
Problems	150
 Chapter 5. Noise in Optical Detection	 152
5.1. Introduction	152
5.2. Photon Noise: Emission and Interaction Noise	156
5.2.1. Noise Processes in Laser Sources (Poisson)	158
5.2.2. Noise Processes in Thermal Sources (Bose-Einstein)	161
5.2.3. Photodetection as Bernoulli Trials	166
5.3. Primary Sources of Detector Noise	167
5.3.1. Johnson Noise	168
5.3.2. Shot Noise	173
5.3.3. Generation-Recombination Noise	174

5.3.4. Temperature Noise	177
5.3.5. $1/f$ (One-over- f) Noise	182
5.3.6. Microphonic Noise	183
5.3.7. Popcorn Noise	184
5.3.8. Total Noise in Photoconductors	185
5.4. Electronic-Interface Noise	185
5.4.1. Quantization Noise	186
5.5. Noise Bandwidth	188
5.6. Detector Response Speed	190
References	194
Bibliography	195
Problems	195

Chapter 6. Figures of Merit for Optical Detectors 200

6.1. Introduction	200
6.2. Responsivity	200
6.3. Noise Equivalent Power	202
6.4. Detectivity	204
6.5. Blackbody/Spectral Figures of Merit Relationships	205
6.6. Photon-Noise-Limited Performance	209
6.6.1. Signal-Dependent Noise	209
6.6.2. BLIP Performance	211
6.6.3. D^{**} : D Double Star	219
6.6.4. Actual D^* Performance	219
6.7. Johnson-Noise-Limited Performance	221
6.8. Testing Detectors and Describing Their Performance	223
6.8.1. Relative Spectral-Response Tests	227
6.8.2. Low-Background-Flux Tests	229
References	229
Bibliography	229
Problems	229

Chapter 7. Photovoltaic Detectors 239

7.1. Introduction	239
7.2. P - N Photodiode	241
7.2.1. P - N Junction under Bias Conditions	246
7.2.2. Optical Detection	247
7.2.3. Photodiode i - v Curve	250
7.2.4. Photodiode Resistance	253
7.2.5. Electrical Interface to Photodiodes	257
7.2.6. Sources of Noise	264
7.3. Silicon Photovoltaic Detector	267
7.3.1. PIN Photodiodes	272
7.3.2. Avalanche Photodiodes	283

7.4.	Germanium Photodiodes	294
7.4.1.	Construction of Ge Photodiode	294
7.4.2.	Operating Characteristics of Ge Photodiodes	295
7.4.3.	Figures of Merit	300
7.5.	InSb Photodiode	305
7.5.1.	Physical Properties	306
7.5.2.	InSb Detector Fabrication	309
7.5.3.	Operational Characteristics of InSb	310
7.6.	GaAs Photodiodes	312
7.6.1.	GaAsP	314
7.6.2.	InGaAs	316
7.7.	HgCdTe	317
7.7.1.	Quantum Efficiency for HgCdTe	320
7.7.2.	Control of the Mixing Ratio in $\text{Hg}_{1-\alpha}\text{Cd}_{\alpha}\text{Te}$	320
7.7.3.	RA Product	322
7.7.4.	$1/f$ Noise	322
7.7.5.	Manufacturability	325
7.7.6.	Summary of $\text{Hg}_{1-\alpha}\text{Cd}_{\alpha}\text{Te}$	325
	References	326
	Bibliography	327
	Problems	329

Chapter 8. Photoconductive Detectors **334**

8.1.	Introduction	334
8.2.	General Analysis of Photoconductors	334
8.2.1.	Photoconductive Gain	341
8.2.2.	Quantum Efficiency	342
8.2.3.	Temporal Response	342
8.2.4.	Noise Processes in Photoconductors	343
8.2.5.	D^* and NEP Relations	346
8.3.	Mercury Cadmium Telluride Photoconductors	348
8.3.1.	Responsivity	352
8.3.2.	NEP and D^*	354
8.3.3.	Operational Constraints	355
8.3.4.	Summary	356
8.4.	SPRITE Detectors	357
8.4.1.	Theory of Operation	358
8.4.2.	Detector Description	364
8.5.	Extrinsic Photoconductors	366
8.5.1.	Response Time	369
8.5.2.	Responsivity and Noise	370
8.5.3.	Cooling Requirements to Achieve BLIP	371
8.5.4.	Operational Constraints of Extrinsic Photoconductors	372

8.6. Impurity Band Conduction	374
8.7. Lead Salts	376
8.7.1. Lead Sulfide	378
8.7.2. Fabrication	379
8.7.3. Lead-Salt Detection Mechanism	382
8.7.4. Flash Effects/Precautions	385
8.7.5. Noise Processes in Lead-Salt Detectors	385
8.7.6. Performance Characteristics	388
8.7.7. Preamplifier Configuration	388
References	390
Bibliography	391
Problems	392
Chapter 9. Thermal Detectors	395
9.1. Introduction	395
9.2. Theoretical Performance of Thermal Detectors	398
9.3. Spectral-Response Determination	402
9.4. Responsivity Analysis for Thermal Detectors	404
9.5. Bolometers	408
9.5.1. Thermistor Bolometer	413
9.5.2. Cryogenic Bolometer	414
9.5.3. Immersion Optics	421
9.6. Pyroelectric Detectors	424
9.6.1. Poling	427
9.6.2. Theory of Operation	427
9.6.3. Figures of Merit	429
9.7. Detector Temperature Constraints	430
References	435
Bibliography	435
Problems	437
Chapter 10. Schottky-Barrier Photodiodes	439
10.1. Introduction	439
10.2. Fabrication of PtSi	440
10.3. Internal Photoemission	441
10.3.1. Photoexcitation	442
10.3.2. Transport	442
10.3.3. Emission	442
10.4. Theoretical Performance	443
10.4.1. Quantum Efficiency and Responsivity	443
10.4.2. Fowler Plot	444
10.4.3. Fermi Sphere	444
10.4.4. Quantum Yield C_1	447
10.5. Dark Current	450

10.6. Summary	451
References	452
Problems	452
Chapter 11. Bandgap-Engineered Photodetectors: Multiple Quantum Wells and Superlattices	454
11.1. Introduction	454
11.2. Multiple-Quantum-Well Photodetectors	460
11.2.1. GaAs/GaAlAs	465
11.3. Superlattice Optical Detectors	470
11.3.1. Lattice-Matched Superlattice	471
11.3.2. Strained-Layer Superlattice	472
11.4. Applications	481
11.5. Future Outlook	482
References	482
Bibliography	484
Problems	485
Chapter 12. Infrared Search Systems	486
12.1. Introduction	486
12.2. Scan Formats	487
12.2.1. Single-Detector Scan Formats	487
12.2.2. Multiple-Detector Scan Formats	489
12.2.3. Parallel Scan	490
12.2.4. Serial Scan with Time Delay and Integration	491
12.2.5. Staring Systems	493
12.3. Range Equation	494
12.3.1. Optics	497
12.3.2. Target	498
12.3.3. Detector	499
12.3.4. Signal Processing	499
12.3.5. A Search System (non-BLIP) Preliminary Design	499
12.3.6. Range Equation for Search Systems: BLIP	501
References	502
Bibliography	502
Problems	503
Chapter 13. Modulation Transfer Function	505
13.1. Introduction	505
13.2. Definitions	505
13.3. OTF, MTF, and PTF	507
13.4. Calculation of Optical-Subsystem MTF	509

13.5. Calculation of Electronic-Subsystem MTF	512
13.6. Detector MTF	513
13.7. MTF Measurements	514
13.7.1. Overview	514
13.7.2. Impulse Response	515
13.7.3. Line Response	516
13.7.4. Edge Response	516
13.7.5. Sine-Wave Response	517
13.7.6. Bar-Target Response	517
13.7.7. Random-Target Response	520
References	522
Bibliography	523
Problems	523
 Chapter 14. Thermal-Imager Systems	 526
14.1. Introduction	526
14.2. NETD Derivation	526
14.3. Measurement and Use of NETD	530
14.4. Johnson Criteria	531
14.5. Minimum Resolvable Temperature Difference	533
14.6. Measurement of MRTD	534
14.7. Analytical Model for MRTD	535
References	537
Bibliography	538
Problems	538
 Appendix A: Blackbody Integrals for Photon Exitance and Radiant Exitance	 540
Appendix B: Basic Program for Integrating Planck Equation	548
Appendix C: RMS Evaluation	550
Appendix D: 10% to 90% Rise Time Related to Time Constant	551
 Index	 553
